

HAVANTEC

FOOD EQUIPMENT

Havantec Lazy Suzan

The Havantec turntable is ruggedly constructed of stainless steel. The table is equipped with one speed and therefore has one speed of 3.1 RPM (rotations per minute) Optionally it can be supplied with a heavier motor or frequency controlled.

The Havantec Lazy Suzan is mainly used as a buffer table behind a production or packaging line in the food industry.

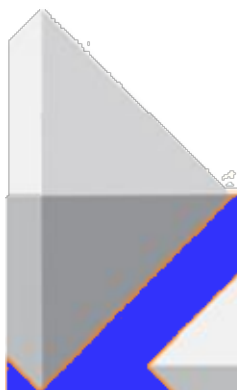

Havantec also has the ability to deliver Lazy Suzans with specific requirements from the customer.

Should you have questions in response to this option, we would like to hear from you.
